

Built on deep rooted core values, CTR is 53 years strong. Our foundation is built on values that dig deeper than just our processes and procedures; it's built on our talented staff. With just over 90 employees, CTR is looking to add 3 - 4 mechanically inclined General Labourers to our team. We are seeking a full time and permanent employee.

"I feel respected by my supervisor, believe that I am valued. I am NOT micromanaged! I feel like we are a Team, and I know that my coworkers can, and have, covered for me well when needed. We can perform our duties knowing our decisions will be supported. If there is a better direction that could have been taken, there isn't criticism, just discussion on how to best proceed next time." Anonymous CTR Employee of over 20+ years!

The successful candidate will have basic mechanical knowledge to install General Components heaters for our customers in Winnipeg and the surrounding areas. This role will focus on mechanical ability and CTR will provide on-site and on-the-job training and mentorship. We ask our General Labourers to start in this position with a career map set to move onto our Carrier Transicold refrigerated units at 12 months of service.

We are offering a schedule of 8:00 AM – 4:30 PM or 8:30 AM – 5:00 PM Mon – Fri. There may be opportunities for overtime and weekend shifts.

- In a General Labourer role, your key responsibility will be to install and maintain air / coolant heaters to new and existing customers in a timely and attentive fashion.
- Ideally the successful candidate will have some of their own tools, but we are willing to work with the right person and can provide tools until the successful candidate is able to provide their own.
- Prior experience working in a mechanical trade is an asset, but not required. There is no trade certificate required for this role.
- Other duties as assigned.
