Job description

Job description

established in 1997, eastside industrial started out as a coatings business, preparing and painting fiberglass and metal components for local oems.

Eastside industrial serves dozens of oems across north america with tooling prototyping, assembly, coatings and composites manufacturing solutions. Eastside industrial continues to see growth as we expand our operations to accommodate higher scale and more innovative production methods to continue meeting our current and targeted customer needs.

If you want to work for a family business with opportunity to grow within the business and be part of a great team, eastside is the place for you.

Position purpose

this position will assist in all aspects of the part prep process which includes cleaning, sanding components and performing minor repairs with the appropriate materials per applicable standard procedures and work instructions including other duties as required. This job is for a reliable, hard working individual that has a high level of attention to detail, excellent hand eye coordination with the ability to work independently and efficiently while being focused on safety and continuous improvement aspects.

Duties and responsibilities

- working in a safe manner and following all safety rules.

- ability to wear half face respirator while performing work tasks
 - collect parts and required prep from storage location / racks and place on workstation for processing
 - inspect parts to ensure part meets required specifications to process.
 - utilizing pneumatic tools, sand, patch and clean the part to designated requirements
 - transport completed parts to the next work station or holding area.
 - ensure the flow of work orders is maintained as directed by following schedule and proper staging of jobs
 - complete assigned work within given timeframe and according to specifications
 - keep all work areas including part storage area clean and organized, emptying scrap and garbage containers as necessary
 - cleaning and maintaining work tools such as sander and repair tools
 - cleaning and maintaining safety equipment such as respirators and dust masks.
 - maintain all quality standards in accordance with the specifications for each job in order to meet customer requirements
 - performs additional duties as deemed necessary
 - takes initiative and is a self starter
 - ability to prioritize and handle multiple duties/projects at one time, work independently with minimal supervision, and resolve conflict in a professional manner.
 - maintains open communication and a team-oriented work environment with all departments and all levels of personnel
 - demonstrates flexibility and professionalism throughout the day
 - adhere to all start / end times including break and lunch schedules
 - willingness to work in other areas of the facility as required
- qualifications / experience / required skills
- preferred: high school diploma or ged from an accredited school system or program
 - preferred: 6 months of related experience in an industrial manufacturing environment

- possess knowledge of and ability to identify and work with frp components and machining tools / equipment
- background in motor vehicle prep and paint
- ability to follow verbal and written instructions
- comfortable with repetitive tasks
- position requires physical requirements including lifting, pushing/pulling, lifting, bending/stretching and standing.
