

# **Sewer & Water Pipelayer**

## **Fanset Construction Co. Ltd.**

**Job Descriptions:** Installs, fits, repairs, and maintains water, sanitary, sewer, and storm drainage pipe systems.

### **Main Duties**

- Install new pipes around a property using an eclectic assortment of tools, including transit levels, grade rods and levels
- Measure the surrounding area where the pipes are going to be installed and cut the pipes to match the allotted area
- Connect multiple pipes together by sealing joints, which will entail using glue, cement or welding devices
- Dig trenches when pipes need to be laid beneath the earth, and cover the pipes once they are in place with dirt or other similar materials
- Locate existing pipe around a property that needs to be removed by utilizing radio or magnetic indicators
- Train other pipelayers in the process, and supervise new hires initially to ensure they are able to work independently
- Drill holes into a property's pipe line in order to install auxiliary cables and other devices into the system
- Operate pickup trucks and rollers frequently whenever materials need to be transported away from the worksite.

### **Qualifications**

- Certification in pipelaying or one year of experience in the field
- Ability to perform intense manual labor
- Knowledge of pipelaying practices and commitment to safety
- Strong leadership skills

**Hours: Full Time**

**Wages: \$20.00 - \$30.00/HR depending on skills and experience**

**Language: Able to communicate and take directions**

**Location: Winnipeg and surrounding area**

**Transportation would be required**
