

## Maintenance Technician (Rotating Day & Evening Shift)

Our client, a leading manufacturer of fiberglass components is seeking a versatile and mechanically inclined Maintenance Technician to join the Maintenance team in their Winnipeg manufacturing facility. Reporting to the Maintenance Supervisor, the successful candidate will be responsible for the maintenance and repair of mechanical equipment and the production facility.

### The Role & Objectives

The ideal candidate will be responsible for developing creative maintenance solutions to ensure that the production facility and plant equipment are in good working order. To achieve this, the successful candidate will:

- Install, maintain and repair plant machinery, including Air Makeup, Exhaust and CNC equipment and other systems.
- Perform facility repair and maintenance, including basic carpentry, electrical, plumbing, painting, flooring, etc.
- Document and report all equipment maintenance by updating the maintenance management system to ensure that maintenance requests are completed and recorded in a timely manner.
- Monitor the use of and inventories of maintenance supplies and equipment.
- Other maintenance duties, as required.

### The Candidate and Qualifications

- Minimum of 3-5 years' of general maintenance experience working with mechanical equipment in a comparable environment.
- A trade license is not mandatory; however, a demonstrated working knowledge of mechanical equipment, electrical and plumbing is preferred.
- Detail oriented approach with an ability to organize and prioritize workload
- Self-motivated and reliable team player with a can-do attitude
- Ability to work a rotating shift (2 weeks day shift, 2 weeks evening shift)
- Ability to work with heights, lift over 50lbs and work in a manufacturing work environment
