We appreciate our people, and work together with them to constantly improve our company. We strongly believe that having the best people is how we can provide the best service to our customers. We are in the CRN Top 30 Solution Providers as well as a Triple Crown Winner.

Senior Consultant – Modern Workplace

Location: Regina, Saskatoon and, Winnipeg remote.

Description

As a Senior Consultant, you will be working on various sized clients delivering Design and Implementation services for Microsoft On-premises and Cloud infrastructures. The activities included in the Professional Services will range from pre-sales, migration projects, knowledge transfer, design documentation, escalations support, and other related tasks.

Qualifications

- In-depth understanding of the capabilities of Microsoft 365, Windows 10, Intune/SCCM, Office 365, Enterprise Mobility + Security (EMS), SharePoint, OneDrive and Teams
- Expertise must include architectural design, development, migration, management and supporting Microsoft 365 implementations.
- In-depth knowledge and experience with Microsoft Identity Management (MIM) solution components, including Azure AD and Active Directory solution design, configuration and administration
- Hands-on experience with Microsoft 365 (including hybrid and cutover) migrations, services, design, and topology.
- Proven experience with Integration of these technologies with various security capabilities including mail gateways, multi-factor authentication, encryption, and e-discovery.
- MS-100, MS-101, MS-203, MS-500 certifications assets

Key Roles and Responsibilities

- Assist with, manage, and execute Microsoft 365 migrations of various sizes and scopes.
- Maintain updated knowledge in Microsoft technologies including Office 365, Active Directory, Exchange and Teams. This includes certifications that may be needed by Powerland to participate in future opportunities.
- Assist sales on pre-sales engagements by providing technical depth on specific technologies.
- Manage and provide support to existing Microsoft 365 clients when issues are escalated to your team.

- To provide mentorship and to train and educate our Professional Services and Managed Services teams on Microsoft Cloud technologies, both proactively and reactively as required.
- Be responsible and take personal accountability for the technical delivery of an assigned project.
- Act as a mentor for all technical levels engineering resources to expand their skills and capabilities.

To apply for this position, please submit your resume for consideration.

We thank all those that apply, however only those selected for an interview will be contacted.

All qualified applications will receive consideration for employment without regard to race, colour, national or ethnic origin, religion, age, sex, sexual orientation, gender identity or expression, marital status, family status, genetic characteristics, or physical or mental disability. We provide reasonable accommodation to qualified applicants during the recruitment process, interview process and employment process. If you require accommodation, please contact our Human Resources department
