## Job Title

Principal

## Job Description

Looking for workers in the general **Winnipeg** area to complete retail site surveys (for the installation of equipment). We pay a piece rate (specific amount per completed project) based on a \$40 - \$80 per hourly rate. This is a great opportunity to make good money, around a flexible schedule.

No experience or specific skills required (everything can be taught), just require the following equipment: Smart Phone (Android), 3 tape measures, electrical outlet tester, level & (preferably) laser measure. All of these items can be purchased local hardware store (inexpensive).

Survey is facilitated through smart phone ap, involves answering a series of questions, taking measurements & photos. This information then helps us determine if the specific location has enough space for equipment installation.

We have an immediate need for a survey to be completed this week, and will lead to larger scope survey projects over the next few months (+100s of sites).

This work is flexible in nature, it can be completed around your schedule (evenings, days off) or regular M-F / 9 to 5 hours.

This work lends itself well to people who are "handy" (enjoy contracting or IT type work), the retired, students, full time employed looking for extra cash or those who prefer a more flexible work schedule.

If interested please respond with:

- 1) Full name & email contact (responses without email will be disregarded)
- 2) Availability (days of the week & time) and Work experiences (including any relevant skills)

Thanks!
