

Enterprise Architects

Solvera

Job Description: One of the main duties of an Enterprise Architect is to produce a comprehensive analysis of a firm's IT systems and infrastructure to determine where improvements are needed. Once this is done, they will design new systems and procedures in close consultation with senior management to reach agreed-upon goals.

Main Duties:

- Presenting proposals to management
- Writing a business vision or plan explaining how the proposed changes can best be implemented
- Communicating effectively with staff to learn how current business operations work
- Leading the transition to new IT procedures by offering training to employees
- Researching new developments in computer technology and business practices to stay familiar with cutting edge trends

Employment Requirements

- Strong analytical skills to examine business data and operating procedures
- Critical thinking skills for identifying issues and making proposals to tackle them
- Ability to explain technical procedures in an easy-to-understand way
- Excellent report writing skills
- Willingness to constantly learn new things and stay on top of the latest developments in IT and business practices

Hours: Full Time

Wages: Dependent on qualifications and experience

Location: Winnipeg

Transportation: Accessible by public transit and solvera subsidizes transportation each month
