

Developer, Software (NOC 21232)

Description

We are looking for an E-commerce Software Developer to join our dynamic team and play a pivotal role in developing and maintaining our online ordering system and integrating the ERP system tailored to our business. Your expertise in e-commerce platforms and deploying and implementing suitable ERP solutions for optimizing user experiences will be critical for the job. Collaborating closely with cross-functional teams, you will be ensuring top-notch system performance and customer satisfaction.

Duties

Maintain existing ERP system by making modifications and writing programs and scripts customized to business applications.
Perform continuous improvement over existing software systems to maximize scalability for future expansion and added payload.
Communicate technical problems, processes and solutions
Prepare development progress updates and documenting ERP processes.
Perform diagnostic tests and resolving issues to optimize performance.
Provide technical support and training ERP end-users.
Conduct tests and perform security and quality controls
Lead and co-ordinate teams of information systems professionals by installing ERP software and ensuring seamless integration with IT systems.
