

# Construction Quality Specialist

## Description

### Construction Quality Specialist - Join EF Moon Construction!

EF Moon Construction is a civil contractor specializing in underground utilities, road building, and excavation. We take pride in delivering high-quality work while fostering a positive, team-oriented work environment. When you join us, you're not just another worker—you're part of a team that values skill, safety, and career growth.

EF Moon Construction is seeking a Construction Quality Specialist to support sewer and water infrastructure projects, with a primary focus on monitoring and verifying pipelaying operations. This role is essential to ensuring all work meets established standards of quality, safety, and compliance.

## Duties

### Key Responsibilities

- Conduct inspections of sewer and water pipeline installation, including bedding, alignment, grade, and jointing.
- Verify that work adheres to contract documents, municipal specifications, and applicable standards.
- Document observations, prepare daily inspection reports, and track corrective actions.

## Closing Date

July 31, 2026

## Categories

Trades and Construction

## Employer

EF Moon Construction

## Location

Rural

## Address

1200 Lorne Ave E  
Portage la Prairie,  
R1N 4A2

## Job Type

Full-time

## Education Level

High School

## Email

- Collaborate with supervisors, pipelayers, equipment operators, and project managers to resolve quality-related issues in the field.
- Provide proactive oversight to identify and mitigate potential deficiencies before they impact the project.
- Maintain a consistent presence on-site to uphold EF Moon's commitment to safety and quality.

## **Qualification**

### **Qualifications**

- Proven experience in sewer and water construction, specifically with pipe installation.
- Strong knowledge of industry standards, municipal requirements, and QA/QC practices.
- Ability to interpret construction drawings, specifications, and survey data.
- Detail-oriented with excellent problem-solving and documentation skills.
- Strong communication and interpersonal abilities for effective collaboration with project teams.
- Commitment to safety and quality as top priorities.
