

Skilled Demolition Worker

Description

At 204 Demolition & Salvage, we take things apart so great new things can rise in their place. We're building a team of highly skilled, safety-minded tradespeople who take pride in their work. If you are an experienced millwright, welder, fitter, fabricator, torcher, carpenter, scrap metal processor, boilermaker, ironworker, or scaffolder - we want to hear from you!

This is not an entry-level labourer position. We are looking for experienced workers with trade or demolition backgrounds.

As a Skilled Demolition Worker with 204 Demolition & Salvage, you'll take on a key role in the safe and efficient completion of demolition projects. This position requires strong hands-on skills, attention to detail, and a commitment to safety. You'll work both independently and as part of a skilled, team-oriented crew to carry out complex demolition tasks that prepare sites for reconstruction and redevelopment.

Duties

Key Responsibilities

- Perform more technical tasks involving the dismantling and removal of structural elements, including steel and reinforced concrete beams, columns, and supports
- Safely operate and maintain power tools, such as breakers, cut-off saws, torches, and other handheld equipment
- Work from blueprints, site plans, or supervisor

Closing Date

August 31, 2026
