Carpenter

Description

We are seeking a skilled Cabinet Maker & Installer to join our team. This position requires a professional craftsman who is equally comfortable executing precision woodworking in our production workshop and providing flawless, polite final installations at our residential and commercial customer locations

The ideal candidate has a sharp eye for detail, deep knowledge of cabinet joinery and materials, and excellent communication skills when interacting with clients on-site

Duties

Key Responsibilities

Workshop Production (Approx. 50-70% of time)

- Fabricate & Assemble: Build high-quality custom cabinets, casework, wardrobes, and custom millwork from shop drawings and blueprints.
- Machine Operations: Safely operate stationary and hand-held woodworking machinery including table saws, jointers, routers, CNC, shapers, and edge-banders.
- Material Prep: Read cut lists, select premium woods, plywoods, veneers, and MDF, and cut/shape components with high precision.
- Hardware Fitting: Pre-drill and install functional hardware such as concealed hinges, drawer slides, pulls, and specialized

organizers in the shop to ensure proper alignment.
- Finishing Prep: Sand, putty, and perform final quality checks before cabinets go out for finishing or transit.

On-Site Installation (Approx. 30-50% of time)

- Site Preparation: Transport built units safely to customer sites, verify on-site dimensions, and protect the customer’s floors and walls before starting work.
- Precise Installation: Mount upper and lower cabinets securely, ensuring everything is perfectly plumb, level, and square—even when dealing with uneven walls or floors.
- Finish Carpentry: Scribe and fit filler panels, toe kicks, crown molding, and trim to seamlessly blend cabinetry into the customer’s space.
- Customer Relations: Represent the company professionally on-site, address minor customer adjustments patiently, and maintain a meticulously clean workspace.
- Other tasks as required by the job

Qualification

Required Qualifications & Skills

- Experience: Minimum of 3–5 years of professional experience in custom cabinet making, bench carpentry, or architectural millwork.
- Technical Skills: Expert proficiency in reading blueprints, shop drawings, and technical schematics.
- Mathematical Precision: Strong basic math skills for calculating dimensions, fractions, allowances, and material yields.
- Physical Stamina: Ability to lift and maneuver heavy cabinet boxes, bend, kneel, and stand for extended periods.
- License: Must possess a valid driver’s license with a clean driving record to transport materials or drive the company installation van.
