About the Role

Reporting to the Occupational Health Manager, you will be part of a new on-site nursing program at a mine site near Bissett Manitoba. This role is broader than emergency standby. You may support emergency response, occupational health assessments, medical surveillance, return-to-work and case management, working closely with physicians and industrial hygienists to help keep workers safe and healthy. All duties are performed within the scope of your nursing licence and site authorization.

Duties

Responsibilities

- Perform occupational health testing, including pre-employment medicals, fitness, drug and alcohol (including DOT), audiometric, spirometry and vision testing, and respirator fit testing where qualified.
- Support on-site emergency response, including cyanide exposure response.
- Complete occupational health assessments and medical surveillance, working with physicians and industrial hygienists.
- Support workplace injury reporting, Workers Compensation Board (WCB) claims, return-to-work plans and case management, including review of medical documentation – where applicable and within scope of practice.
- Support substance use cases, including referrals, follow-up testing and return-to-work processes, in line with site policy.
- Review chest x-rays as required.
- Complete intake and accurate records, and share test results and next steps with workers.
- Provide on-call and after-hours support as needed.
- Follow infection prevention and control (IPAC) guidelines and provide a calm, positive experience for every client.
- Help train new staff and support policy review and development.

Qualification

Qualifications & Requirements

Email

info@nssr.ca

- Must be a Registered Nurse (Bachelor of Nursing degree preferred), licensed and in good standing with the College of Registered Nurses of Manitoba.
- Strong general nursing skills; outpatient, ambulatory care or emergency room (ER) experience preferred.
- Occupational health experience and prior cyanide training or familiarity preferred.
- Willing to obtain Occupational Health Nursing certification. NorthStream will support you.
- Current BLS/CPR certificate and a valid driver’s licence.
- Able to meet the site’s pre-access requirements, including medical screening and fit-for-duty testing
- Comfortable living in camp and working a 7 days on / 7 days off rotation.
- Comfortable with documentation and administrative tasks, including Microsoft 365 and Adobe Acrobat.
- Strong communication and customer service skills, with the ability to build trust with people from diverse backgrounds.
- Organized, self-motivated and discreet, able to work independently and as part of a team in a fast-paced environment.

Assets: OHN certification; experience giving cyanide antidotes; First Aid Trainer certification; remote, rural or industrial nursing experience; experience with Veriport (test result reporting) and Jane (invoicing).

Training Provided: Breath Alcohol Technician, Audiometry and Spirometry certifications, plus other certifications as required.
